Sounds o.k. to me. I would suggest using the desk statement as the reply. Dave Deegan should be able to handle it.

Subject: FW: NPDES Permit Pilgrim Nuclear Power Station

Damien,

We've received two of these today. I suggest we (George?) draft a response that can be used from last week's briefing notes and work with the RA's office to respond to them. Maybe if we supply the note, the RA's office can send them. What do you think?

Mr. David Webster, Water Permit Branch Chief

EPA Region 1

RE: NPDES Pilgrim Nuclear Power Station

As is called for by the June 8, 2015 report by Cape Cod Bay Watch, this is to ask you to terminate

Entergy corporation's Clean Water Act "National Pollutant Discharge Elimination System" (NPDES) permit for the Pilgrim Nuclear Power Station, which allows discharge of thermal and radiological pollution into Cape Cod Bay, until the company demonstrates compliance with environmental protection laws and regulations. Both the Massachusetts Department of Environmental Protection and the Environmental Protection Agency have allowed the company to continue to operate with a permit that expired in 1996, despite no demonstration of compliance with clean water requirements.

Here is a link to the Report: <http://www.capecodbaywatch.org/2015-water-pollution-report/>

I will contact you in two weeks to learn what action you have taken.

Thank you.

John Nichols
